Board of Trade Elects Officers

As the result of a determined drive to secure members for the Lacombe and District Board of Trade, headed by Messrs. Norman Morrison, Stafford Boyd, C. D. Macleod, and Secretary Jesse Fraser, 108 members were present at the annual meeting and dinner at the Adelphi Hotel on Thursday evening last. It was without exception the most representative and enthusiastic gathering of citizens ever held in Lacombe, and the outlook is that the enthusiasm will be shown in tangible form during the coming year. After this dinner, which was served in the usual first-class Adelphi style, the remaining part of the evening was given to a short and humorous talk by Mr. DeLong, who has held the office of Board President for the past six years, and has been an indefatigable worker in the interests of the town and district. Short addresses were also given by the President-Elect Henry Treane, the Vice-President, Stafford Boyd; W. N. Morrison; Secretary Fraser, Mayor Jones, and others, in which they pointed out the possibilities for work on the part of the Board, and predicted good results. Suggestions of what the Board could take up with benefit to the community were put before the meeting, and from the enthusiasm displayed the Executive will have no difficulty in securing help in their endeavors. Inspector McLean of Red Deer, was present and told of the coming Musical Festival and Sports Day being organized for Lacombe on May 18. The election of officers resulted as follows:

President: Henry Treane.
Vice-President: Stafford Boyd.
Executive: Norman Morrison, John Gilmour, O. Vickerson, F. A. Switzer, C. D. Macleod, F. H. Reed, G. T. Jackson and J. S. McCormick.

MRS. WM. SAGE INJURED

Mrs. William Sage is in hospital here suffering from a fractured thigh, sustained when she slipped and fell on the icy sidewalk last Monday evening. Reports from the hospital state that she is progressing favorably.

LACOMBE TO HAVE GREAT BOXING TOURNEY

Jimmy "Tex" Rickard, Teller, Alberta's best-known fight promoter has good news for fight fans here. About the end of April, one of the greatest boxing tournaments ever attempted in Central Alberta will be staged. Although Jimmy has nothing definite on who will be here, he says that every fighter on the list will be a headliner. It is Jimmy's idea to take fighters who have fought in the main events of the different big tournaments in Northern and Southern Alberta. There will be no "bouts" in any of the bouts. As all fight fans know, when Jimmy organizes a bout, it will be a real one, everyone is assured that the projected tournament will be no exception.

Staging this monster card is the result of requests from fight fans all over the province. Jimmy is noted for high standard of fights he promotes, and Lacombe is considered by enthusiasts all over the province as the ideal spot for a tournament, being centrally located and a junction of first class gravel highways from North, South, East and West. Fight fans will recall the huge crowds that always attended Jimmy's previous tournaments here. Every fight he ever promoted was a great success from every point of view.

Well fans, keep your eyes open for the large posters about this event, and watch this paper for further announcements.

AT THE AVALLON

"Shoot the Works"

Starring Ben Bernie and his Band, Jack Oakie, Dorothy Dell, Arlin Judge, Alton Skipwith also "State Trooper" a live action picture starring Reg. Looney and Evelyn Knapp.

COMING: "Baby Take A Bow" starring Shirley Temple, James Dunn and Claire Trevor. Also pictures of the Dionne Quintuplets after 6 months of scientific care. March 28, 29 and 30.

W.A. Rogers in "Handy Andy" April 4, 5, 6.

It looks now like an advance in price will come by summer on beds, springs and mattresses. Better see us soon as our stock is large and prices will remain the same as usual, while stock lasts. Lacombe Furniture Store.

A Plan to Pay Debts

We clip the following from the column of J. S. Cowper in the Edmonton Bulletin. He says:

"Here is a plan by which all the municipal debts of Canada could be liquidated in full, without repudiation, without confiscation and without bankrupting the taxpayers. It would net the whole of industry turning around, as well as ensure the bondholders full payment of their bonds:

- (1) By arrangement between the federal and provincial governments pay off municipal debts in federal legal tender bills.
- (2) Each municipality shall each year for 50 years deliver up to the Receiver-General legal tender bills of the value of 2 per cent of the amount of the discharged bonds, this 2 per cent sinking fund being a first charge on the municipal revenues.
- (3) The Receiver-General shall forthwith on receipt of the above payments cancel the legal tender.

At the end of the fifty-year period, the whole issue would have been retired.

The legal tender in the hands of the discharged bondholders would be available for all forms of taxes and purchases. It would be as good as the best money in the world for it would be in a state of annual progressive retirement, secured by the credit of the Dominion and the assets of the municipality.

While the federal government would not draw interest on the issue of its legal tender, it would be re-paid by increased revenues from the larger incomes, extended commodity and greater earning power that would follow the liberation of several billions of dollars for the purchase of industry.

It would not adversely affect foreign trade, which has to be financed by exports even at the present time.

If Premier Bennett, or Thomas Bradshaw had tendered this suggestion instead of the "lighten the belts" and similar urgings to economic defecation, it would be hailed as an extremely valuable one. It's worth just as much, and perhaps more, without the imaginary "burden" of the public credit.

Such a use of the public credit for public advancement could remove future as well as present troubles in municipal financing. So long as a municipality was not in arrears in its 2 per cent sinking fund, could have additional revenue from the new undertaking and had approval of the provincial government, it ought to be able to obtain whatever new advances of legal tender it may need from time to time on similar conditions to its borrowings.

We do this sort of thing when we buy automobiles through finance corporations. We ought to have sense enough to do it in our municipal life. Better for the bondholders to take their money in full than have the inevitable repudiation that otherwise will come."

Mr. Brownlee to the Rescue

No matter how much we find ourselves compelled to disagree with many of his views, Mr. Brownlee's championship of the government of which he was formerly the first minister emphasizes in the public mind, and no doubt in the minds of his quondam colleagues, the loss of the cabinet assumed by his retirement. Probably no one on the treasury benches could have championed the administration so ably while no minister could properly have come to the rescue of the ministerial salaries and emoluments as Mr. Brownlee did. From the ranks of the private members Mr. Brownlee was able to defend these as never he could while he was in office.

But his defence of the ministers salaries by a series of "hand-offs" of the civil service" contains a fallacy of some consequence. The cabinet and the civil service are not, either in Alberta or elsewhere, in the same class.

Civil servants become civil servants primarily because of their need to earn a living. Cabinet ministers are supposed to have become cabinet ministers with more altruistic motives in which public service looms largely. That there are cabinet ministers who would have been "better off" in business or the practice of their professions, is not denied. That is their business. Civil servants have been selected for the posts because of their qualifications, whether they are office boys or stenographers or engineers or accountants. Few ministers in the Alberta or any other provincial government have any specialized training for the cabinet appointments they hold. There are ministers in the cabinet with high grade technical qualifications but only incidentally. The cabinet is lucky if a qualified member is available for the right post but the civil service must go and find the man.

The Provincial Treasurer is a new member of the cabinet for the instant, and it is too soon to say whether he will prove to have been more successful as a cabinet minister or as a financier. Criticisms have been heard on the floor of the chamber suggesting a foreboding that he will be no improvement over his predecessor. Mr. Brownlee came gallantly to his rescue but it was rather an unconvincing defence to point out the obvious; that no one can tell how much gasoline will be consumed in the coming year or how many automobile licenses will be taken out or consequently exactly what revenue to expect from these or any other sources. Nevertheless, a government which has consistently under budgeted year after year to the tune of millions of dollars ought to have been able to detect and correct the error after a little experience. But the present provincial treasurer is handicapped; if he does not make the same mistakes as his predecessors the unfavorable comparison of his budget with theirs will give the appearance of fiscal collapse. The miscalculations should have been corrected when it first became apparent that they had been made. Over-optimism should have been smothered at birth. No member of legislature would have budgeted in this way for his private business; no member's wife for her household affairs. But the perpetuated errors of judgment on the part of former provincial treasurers are coming home to roost and no amount of defending or explaining or apologizing can make them anything but what they are.

RULE SHOULD WORK BOTH WAYS

On and after April 1st the Alberta motorist will have to pay a tax of seven cents a gallon on the gasoline used in his car, a tax-rate of approximately 25 per cent. That is a heavy rate of taxation, by no means adequately offset by the reduction of motor license fees, which are still too high for the privilege of driving for six or eight months in the year over the kind of roads we have in Alberta.

The main argument advanced for imposing this heavy penalty on the motorist is that other provinces are doing it. But that argument has now turned out to be a boomerang. The Government of Ontario has promised that all the money collected from motor license and gasoline taxation will be used to improve the highways of that province.

The Government of Alberta, having set the tax-rate on the basis of the maximum that other provinces are levying, cannot escape the demand that it use the money for highway purposes at least one other province has definitely undertaken to do.

FORAGE CROP SEED

NOW AVAILABLE

Limited Quantities of High Quality Sweet Clover, Brome, Timothy, Western Rye, Alfalfa

now available to approved applicants at One-half Cost Price

Admission: Gents 35c. Ladies Free

MARRIED

A wedding of much interest in the community was solemnized on Tuesday afternoon, March 14th, when Dorothy, daughter of Mr. and Mrs. E. Ogilvie of Fairview, was united in marriage to Mr. Norris Flewelling, son of Mrs. Wm. Cheesor, of Lacombe.

Rev. Henry Young, of Trochu, a former minister of Fairview, performed the marriage ceremony. He was assisted by Rev. R. B. Layton, of Lacombe, an old friend of the family.

Entering the room on the arm of her father, to the strains of the Wedding March, played by Cameron Fraser, the bride took her place for the ceremony in a beautiful flower garland decorated with white chrysanthemums and a large white bell. Dressed in a flowered gown, cut cape effect, and with her hair bound by an orange blossom wreath, the bride presented a charming picture. She carried a bouquet of carnations, and was attended by Mrs. Ila Flewelling, who looked lovely in blue silk crepe.

The groom was supported by Mr. Ogilvie.

The bride's mother, Mrs. Ogilvie was gown in a flowered chiffon voile and the mother of the groom, Mrs. Cheesor, wore black lace. For travelling Mrs. Flewelling wore a green swaggar suit with matching accessories.

Invited guests included only the immediate families and close friends and following the ceremony a buffet lunch was served, from a table beautifully decorated with flowers and centred with the bride's cake.

ST. ANDREW'S UNITED CHURCH

Rev. R. B. Layton, Minister Mr. L. D. Wright, Municipal Director

Services at 11 a.m. and 7:30 p.m. March 21st is Anniversary Sunday, and Rev. H. A. Macleod (R.A.), B.D., of Robertson Church, Edmonton, will be the special speaker. He will remain over on Monday, April 1st, to give an illustrated lecture on The Passion Play, which he saw last summer.

Service on Sunday at 2:30 p.m. The Mission Band will meet at the Manse on Friday afternoon, and on Sunday after morning service.

The Y.W.A. meets on Sunday at eight a.m. at the home of Dr. Sharpe.

THE CHURCH OF ENGLAND IN CANADA

Diocese of Calgary

St. Cyprian's Church, Lacombe

Incumbent: Rev. T. H. Chapman

Organist: Mrs. L. D. Wright

March 24th, 3rd Sunday in Lent

10:00 a.m. Sunday School.

11:00 a.m. Morning Prayer and Sermon.

3:00 p.m. Holy Baptism by appointment only.

7:30 p.m. Evening Prayer and Sermon.

TO BE KEPT IN MIND: The Bishop has expressed a desire to be here for the purpose of administering the Sacramental Rite of Confirmation, or "Laying on of Hands," at 7:30 p.m. on Sunday, May 12th. There will be instruction for Candidates every Wednesday at 7 p.m., at the Church.

On Good Friday, (April 19th) the Rector will exchange with the Rev. W. H. Herbert, Rector of Skitter and Rural Dean of the Drumhead Denary. Further particulars later.

Don't forget that, at 8 p.m., on every Wednesday throughout the Lenten Season, there is a short Service at the Church. No collection is taken, but a plate is placed at the door for any who may care to use it.

CANADIAN LIGNER

The annual Vinny Dinner is being held as usual on Tuesday, April 9th at the Church Hall, Lacombe. The Ladies Guild of the United Church are providing the dinner, the speaker for the evening being Col. F. C. Jamieson, M.L.A. The subject of Col. Jamieson's talk and other details will be announced in a later issue of the Globe. Remember the date.

Are You a COLDS-SUSCEPTIBLE?

Do You CATCH COLD Easily? Do Your Colds Hang On AND ON?

At the first warning sneeze, stuffiness or nasal irritation, quick—apply Vicks Vapo-Rub—standby of two generations for relieving colds—just a few drops up each nostril. Its timely use helps to prevent many colds, and to throw off colds in their early stages.

Don't take chances with half-way measures. Rub on Vicks Vapo-Rub—standby of two generations for relieving colds. Its direct double action—by stimulation and inhalation—helps to end a cold sooner.

WELCOME NEWS FOR COLDS-SUSCEPTIBLES!

These twin aids to fewer and shorter colds give you the basic medication of Vicks Plan for Better Control of Colds. You'll find full details of this unique, clinically tested Plan in each Vicks package.

VICKS PLAN FOR BETTER CONTROL OF COLDS

WORLD HAPPENINGS BRIEFLY TOLD

T. W. Grive of Montreal was elected president of the Canadian Produce Association at its annual meeting in Toronto in conjunction with the 23rd annual convention.

Rear-Admiral Richard E. Byrd, who arrived at Dunedin, N.Z., with his second Antarctic expedition, disclosed the expedition is \$50,000 in debt.

Toronto Centre presbytery of the United Church of Canada voted 51-20 in favor of ordination of women as ministers. The decision will be passed on to the general council of the United Church.

Steps to organize a Canadian coal committee with a view to encouraging wider markets and greater consumption of this Alberta product were taken at a meeting of representatives of boards of trade and other organizations in the province. Official sources charged that reports of a famine in Soviet Russia were part of a deliberate campaign by enemies of the Soviet union and cited recent figures to show the wheat crop last year was larger than that of 1933.

Canada's revenues for present fiscal year are running \$31,000,000 and \$32,000,000 ahead of last year. The Dominion's revenues are figured every day. They include customs, excise and income tax receipts, post office revenues, tax on gold and several minor sources.

Dr. H. A. Bruce, lieutenant-governor of Ontario, urged Toronto city council to start immediately on a slum clearance program. Dr. Bruce stated Canada was lagging behind the rest of the world in state-assisted housing and it was up to Toronto to give leadership to the rest of the Dominion.

Radio Commission

No Intention Of Abandoning National Broadcasting Facilities

While the Canadian radio commission was drawn within jurisdiction of the proposed new department of communications, the government has no intention of abandoning the idea of nationalized broadcasting facilities, it was learned definitely.

The new department, which will have as its nucleus the department of railways and canals, and which will probably be presided over by the present minister of that department, Hon. R. J. Manion, will take over radio and other forms of communication.

Since its inception two years ago the radio commission has been represented in the House of Commons by the minister of marine.

To Represent Farmers

Question Brought Up In Commons Is Answered

If it is demonstrated that lawyers should be appointed to represent farmers before provincial boards of review under the Farmers' Creditors Arrangement Act they will be appointed. Finance Minister E. N. Rhodes made the announcement in the House of Commons when asked by Cameron McIntosh (Lib., North Battleford).

In the meantime, lawyers for farmers will not be appointed, the finance minister added.

Nearly 3,000 miles of canal are in use in England.

FASHION FANCIES

SMART JACKET DRESS—CUTS TO SIZE 48!

By Ellen Worth

Quite suitable for normal figures besides heavier ones.

You'll be wanting something new and charming in a jacket dress for spring. And here is a delightful pattern. It's slimming, too, with a belt detail down the front of the dress. The revers collar is of velvet too! The jacket has loose wrist sleeves for ease of movement. They give a certain grace to the hands.

As for materials, rough crepe silk pattern resembling a monotone, canton crepe, foulards in diagonal weaves etc., are very smart. Some of the simple woollens could also be used and will make up very satisfactorily.

Style No. 687 is designed for sizes 36, 38, 40, 42, 44, 46, and 48 inches bust.

Size 36 requires 5 yards of 39 inch material with 1/2 yards of 39 inch contrasting.

Pattern 20c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 176 McDermott Ave. E., Winnipeg.

The Spring Fashion Editor says there are better than ever. Entirely illustrated in color you will find it a very stimulating fashion editor.

There are clothes for cruising and clothes to brighten the lives of stay-at-homes. Many delightful little models for the smaller members of the family. Of course, patterns are obtainable for the designs illustrated. Send for your copy to-day, the price is 20 cents.

New Sun Reflector

Very Simple Device Has Been Invented In Germany

A simple device, consisting of a thin sheet of highly polished metal cut somewhat in the shape of a kidney, is a German invention designed to bring sunshine into every home. The reflector is especially useful for directing the health-giving rays of the sun to the face. It also can be used in treating other parts of the body where solar heat brings beneficial results. The polished sheet of metal is corrugated in such a way that its many fluke-like ridges act as multiple reflectors which intensify the heat of the sun's rays.

Friend—"I suppose you have your share of doubtful bills on your table."

Merchant—"Only wish they were. There's no question about most of them."

Rural England Changing

Owners Of Greater Part Of Land Are Unknown

Not since the great industrial revolution in the first quarter of the last century has a change been made in rural England comparable to that which is taking place today, and yet, according to Professor J. J. Macgregor of Cambridge University, "fifty years hence, when historians or economists endeavor to record the present changes, they will find that most of the facts and figures on which the contrast must be made are non-existent."

"What, immediately is much more important," he told a representative of the Morning Post of London, "is that, to-day it is impossible for any one to tell who owns the greater part of rural England. All over the country each year sees the breaking up of scores of country estates, great and small, and the gradual eclipse of the big landowners. Thousands of acres of land—much of it agricultural—belonging to these estates are sold, repurchased, built upon, and acquired by local authorities or commercial undertakings."

"The great houses themselves pass into new ownership or, more often, are converted or left to fall derelict. Their treasures are sold; their traditions are forgotten. Hereditary agricultural estates, embracing scores of dozens or more separate farms, are broken up and the divided owners are left to carry on as best they can."

"Such is the transformation which has continued, almost uninterrupted, since the war."

Two attempts are now being made to have the County Councils keep a record of the transactions—one in London and one in Cambridge—but their scope, said Professor Macgregor is unfortunately limited.

Little Journeys In Science

MATCHES

(By Gordon H. Guest, M.A.)

Perhaps the greatest discovery ever made by man was that of fire, and one of the most useful, if not the greatest, of inventions was that of producing fire by the use of matches. Friction matches containing the element phosphorus were first introduced by an Englishman, John Walker, about 1828. At the present time there are two general types of match in common use, namely the "strike-anywhere" and the "safety" match.

The "strike-anywhere" variety is undoubtedly used the most and is made in the following substances: potassium chlorate which is rich in oxygen; paraffin or sulphur; a binding material such as glue; a filling material such as ground glass, and a compound of phosphorus and sulphur known by chemists as phosphorus sesquichloride. When the ordinary match is rubbed against a rough surface, enough heat is produced by friction to ignite the phosphorus. The heat produced by the burning of the phosphorus is increased by the burning of the potassium chlorate and carried to the wood by the slowly burning paraffin or sulphur.

Substances such as starch, clay, or plaster of Paris are often added to the match head to keep it dry or to regulate the speed of burning. In the "safety" match, red phosphorus, some substance which gives off oxygen readily, such as potassium chlorate, and some gritty material, such as powdered glass, are mixed with glue and placed on the side of the match box. The tip of this type of match contains potassium chlorate and an easily ignitable substance, usually a compound of antimony and sulphur known to the chemist as antimony sulphide. The match cannot easily be ignited by friction except on the prepared surface on the box.

Open To Canadians

New York Magazine Is Conducting Another Literary Contest

Any Canadian novelist who has not published a novel in book form is eligible for an attempt along with his country colleagues to the south at winning \$10,000 offered by a New York magazine and publishing house. This is the fourth competition of its sort, the first of which was won by Martha Ostenso of Winnipeg with "Wild Geese".

All manuscripts must be 50,000 words and must be in before Oct. 15, 1935.

If you ever took a ride in a bumpy aeroplane you'll admit that for once in your life you were glad to be down and out.

The age of man has been placed at 16,000,000 years, by a new comparison of blood serums of mankind and ape.

A Pipeless Organ

Electricity Produces Tones In New

Needless Instrument

A "pipeless pipe organ" that draws its music from automobile headlights beams has made its debut in Philadelphia. Its tones are produced by electricity alone, with no pipes, reeds, strings, record or sound film arrangement.

It is smaller than most pianos, can be moved about at will, and "plugs in" at any electric light socket just like a radio or an electric refrigerator.

The instrument, developed with the aid of Leopold Stokowski, conductor of the Philadelphia Orchestra, was introduced by its inventor, Ivan Bremec, Russian physicist and co-creator of the helicopter. Nine hundred automobile headlights beams, arranged in twelve circular batteries of seventy-five each, throw the beams that create the 1,800 tones the electronic organ can produce.

The beams are turned on by the touch of the keys, arranged in standard keyboard style. In front of the headlights bulbs, twelve slotted metal disks whirl continuously. Through these disks, the beams converge on twelve "electric eyes"—electromagnetic cells—which translate the light to sound and throw the sound through amplifiers.

The tones are built up by mathematical formulae in terms of light values, with the various steps blending with a "fundamental." Each step has a rheostat to heighten or lower intensity and thus obtain different effects. Two foot pedals give volume and tremolo control.

Recipes For This Week

(By Betty Barclay)

ENGLISH YUMS

1 1/2 cup sugar
1 cup evaporated milk
1/2 teaspoon cream of tartar
1/2 cup oleomargarine

1/2 pound pecans, chopped
Combine sugar, evaporated milk and cream of tartar. Cook, stirring constantly, until the soft-ball stage is reached (238 degrees F.). Add oleomargarine and cook until the mixture again comes to the soft-ball stage (238 degrees F.). Add nuts and beat until the mixture becomes dull—pour into a shallow pan which has been spread with oleomargarine. Allow to set and cut into inch squares. Makes 30 1-inch piece.

STUFFED HAM ROLL

Sliced of ham 1/4-inch thick, cut from centre of ham
2 cups moistened bread crumbs
1 tablespoon minced parsley
1 cup tomato juice

Spread bread crumbs over ham; sprinkle parsley over it. Roll up and tie. Pour over tomato juice, adding a little hot water. Place in baking pan, basting occasionally during the two hours usually required for the baking process.

Started In Small Way

Woman Radio Announcer Made First Broadcast In 1917

Mrs. G. A. Donisthorpe who is believed to be the world's first woman radio announcer, went to the microphone recently and told about her early experiences. She explained that she first spoke into the microphone in 1917, when she and her husband, a captain in the Royal Engineers, and a pioneer in wireless experiments, started broadcasting in Worcester-shire to amuse the troops at training centres in the district. "My first broadcast took place in a bell tent in the middle of a large field," she said, contrasting her luxurious surroundings at the British Broadcasting Corporation headquarters with the studio she used in 1917. "I sat on a rickety sugar box. I also said that in those early days she used an ordinary telephone microphone."

Standardized grading appears now

to have become definitely established as a permanent factor in practically all phases of the poultry trade in Canada.

European scientists declare that rain falling in wooded land is 25 per cent. greater than that in open areas.

Figures show that fewer errors are made in night baseball than when the pastime is played in the day.

WHAT DOES YOUR HANDWRITING REVEAL?

By LAWRENCE HIBBERT (Grapho-Analyst) (All Rights Reserved)

(Editor's Note: Have you taken advantage of the author's offer to read your handwriting? It is an opportunity to know yourself better, and it may put you on the path to greater things. Read the offer following this article.)

It is not surprising that many of the letters I receive from readers of my articles ask whether there is any indication of talent. It is natural that people should be vitally interested in finding the best line of endeavour to follow, and any information that helps them to get the best out of their capitalization and make the utmost use of their latent possibilities is always welcome.

Handwriting does indicate talent, and this is not to be wondered at when we realize that handwriting is from the brain, and the brain is the source of individual power and capacity.

But the mere possession of a talent is by no means everything. We all know people who are talented in particular way, but who do not reach any heights of progress, who, in fact, are drifting along without ever doing anything really worth-while.

One case in particular comes to my mind of a man who has a rare talent for drawing. He can do things with a pen and pencil that I have rarely seen equalled by a pen without any training along that line. Unfortunately, he happens to be blessed with more than enough of this world's good, and is in a position where he does not have to work very hard for his money.

The result is that he has never gone to any trouble to bring out the best of his talent, and the world has lost a first-class artist.

This case will illustrate my meaning very aptly. I repeat that the mere possession of a talent does not imply that the talent will be used. There are certain essential characteristics that must be used in order that the talent can be brought into fruition.

The most important of these are Determination, Persistence and Will-power.

Many of my correspondents reveal latent potentialities, but they lack one or more of these other traits that are so vital to progress in anything that you take up.

There are a lot of people who have made real successes of themselves, without any hereditary or inborn talent, because they have had the will and determination to get somewhere. They have worked hard and made sacrifices in order that they might gain success.

An inversely, as I have shown, there are others with the really vital spark of inspiration lying within them who have failed because of an inability to harness their talent.

Verifiably is a good thing to have, but specialization more often leads to a single line, and drive yourself forward with everything that you have along that line.

Too many men in the fire often means that none of them are properly attended to, and the result is failure.

Miss J. C. Regina—You are so versatile that it ceases to be an advantage, and becomes a positive menace to you. You can do so many things fairly well that the trouble is to find one type of specialness. You must do this, if you really want to get anywhere. Take up your singing, and put your whole heart and soul into it. Obtain proper training, and make up your mind that you are going to succeed as a singer. That is the only way.

A handwriting analysis may open the door of opportunity to you. Find out what your writing shows as well as that of your friends. Send specimen of the writing you wish to be analysed, stating the name of the person, and enclosing 50c coin for each specimen, and send with 3c stamped address label to Lawrence H. Hibbert, care of Winnipeg Newspaper Union, 176 McDermott Ave., Winnipeg, Man. All letters are confidential, and replies will be forwarded as quickly as possible. Some delay is unavoidable owing to the large number of letters coming in.

Opened And Closed Line

Alex McCrae, of Hailybury, who a quarter of a century ago drove the first passenger car over the Nipissing Central Railway line between Cobalt and New Liskeard, Ontario, was also at the controls when the final trip was made. He is the oldest employee of the line. Bert Normandy, second in point of service, acted as conductor.

Standardized grading appears now to have become definitely established as a permanent factor in practically all phases of the poultry trade in Canada.

Figures show that fewer errors are made in night baseball than when the pastime is played in the day.

Tribute From Chicago

Daily Paper Gives Unflinching Praise To Winnipeg Figure Skaters

National pride was not hurt at the Daily-News ice carnival when Canadian champions ran one-two in all the diamond-trophy events for men. No one minded these transient conquests, for spectators early had lost their hearts to an invading detachment of fourteen young men and young women from the Winnipeg Winter Club.

Singly, in pairs, in fours, in eights, their artistry, held enthralled one of the greatest groups of spectators ever assembled indoors. It was the most beautiful exhibition of figure skating Chicago has ever seen, and it won tributes which stadium crowds had reserved for presidential nominations.

Chicago long has liked and admired the homeland of these attractive invaders. Their triumph—and the graciousness with which they consented to skate in this benefit for poor children of the city—notably strengthened our ties of affection and respect for Canada and Canadians.—Chicago Daily News.

Another Record Claimed

Man Keeps Motorcycle Engine Running For Eight Days

For 5,836 miles a motorcycle, with sidecar attached, travelled along ordinary roads in Australia without a moment's stoppage of the engine, and a world record is thus claimed by the man who rode the combination most of the time, Victor Barclay. He was relieved at intervals by two others but the engine was never allowed to stop at the change-overs. The ride took a little over eight days, the speed averaged being 30 m.p.h. The engine finally stopped owing to a defective plug.

GARDENING

Gordon L. Smith

Spring is once more approaching and with it the desire in the normal human being to start something growing. Soon all signs of winter disappear, and the earth gradually changes from its drab coat of brown to something green and warm. But before this change, the would-be gardener commences his annual preparations. Plans are drawn up, seed catalogues perused, and equipment is checked over. Much interest is added to gardening by proper planning and much practical value accrues from the purchase of a humble barrow or garden fork. The end result will largely depend upon the thought which precedes actual construction.

With Vegetable Rows Practically all vegetables should be grown in absolutely straight lines. Little things like lettuce, radish and carrots can go in rows from eight to twelve inches apart. Potatoes, peas and beans will need fifteen to eighteen inches and corn and tomatoes twenty-four inches. Pumpkins and melons from 18 to 24. To save space, rows of early and small stuff such as lettuce and spinach can be planted between corn and beans. Where this close planting is followed, it will be necessary to cultivate and fertilize frequently.

Flower Plants In planning the flower garden, time planning is important because some things must be started from seed indoors or in a hot bed. Certain flowers will stand a light frost and some will not. To have flowers from early summer until autumn, time of blooming must be taken into consideration, and heights should be noted down to prevent the things from being hidden by such tall growers as Cosmos, African Marigolds and Stocks. Colors are important. Occasionally two shades do not go well together. Fragrance should be taken into consideration. Flowers like the sweet-scented Evening Stock, while not particularly beautiful, have such a delightful odor, particularly in the early evening, that some of them should be included. Then again, flowers have individual preferences. Some like partial shade. Among these are tuberoses, rosettes, Begonias and autumnal Lupines. The bright Nasturtiums, Portulaca and California Poppy revel in full sun and a dry location. With flowers, shrubs, roses, lawns and all forms of decorative gardening, informal planting is advised. Straight lines should be avoided and those already in existence, like house foundations and fences should be screened. Clumps of shrubbery and a few trees about a house will not only break these harsh lines, but will tend to tie the structure down to earth and produce complete picture.

Oldest Newspaper Paper Founded in China 1,584 Years Ago, Cases Publication

The oldest newspaper in the world, the Peking Hsiao, of China, has ceased publication. It was founded 1,584 years ago during the reign of the Emperor Tsin Kuan Teang, who is considered in China as the inventor of printing. The paper was originally printed on strips of yellow silk sewn together. From being a periodical the Peking Hsiao became a daily paper in 1800. In spite of its many vicissitudes and of being suspended more than once for political reasons, the paper has survived through all ages, which began in the year 400 A.D.

Appointment Of Deputy Secretary Has Been Announced

L. P. J. Roy, native of St. Leonard, N.B., lately in charge of the foreign business and call loan department of the Banque Rivinciale du Quebec, has been appointed deputy secretary of the Bank of Canada. Announcement was made by Governor Graham Towers of the bank.

Announcement was also made that new premises for bank branches had been obtained in Toronto, Vancouver and Montreal, due to necessity of larger accommodations.

The office of the assistant receiver-general in Victoria will be moved to Vancouver where new premises are being obtained to house the British Columbia branch of the bank. Assistant receiver-general offices in Calgary and Regina have been taken over and will be branches of the bank in the Alberta and Saskatchewan cities.

It is the opinion of the various agricultural authorities in Canada that the present coarse grain situation in the Dominion appears to indicate that Canadian farmers generally would be well advised to sow a full acreage of oats in 1935.

SKIN RASHES Give Place To Velvet Smooth Skins

In almost countless numbers, skin sufferers have had cause to be thankful for D.D.D., the prescription of a highly successful physician, Dr. D.D. Dennis. This liquid prescription, now made and endorsed by Canadiana's Italian Skin Specialists, offers relief almost at once, and quickly clears up such skin troubles as eczema, hives, acne, ringworm, dandruff, pimples and itchy skin. Ask your druggist for D.D.D. prescription. Trial size, 50c. Guaranteed to give instant relief or money refunded.

NOW SORE THROAT EASED IN LESS THAN 3 MINUTES!

Rawness, Irritation Go at Once
Note Directions for
New Instant Treatment

Incredible as it may seem, doctors are now prescribing a way that relieves raw, painful sore throat in as little as 2 to 3 minutes!

All you do is crush and stir 3 Aspirin tablets in 1/2 glass of water and gargle with it twice.

Aspirin tablets disintegrate so completely no irritating particles are left. Results are immediate. At once soreness is eased—discomfort allayed.

Everywhere throat specialists urge this *fundamental treatment* instead of less effective old-time "scabs" and "antiseptics." Remember this. And when you buy, see that you get **ASPIRIN**. It is made in Canada and all druggists have it. Look for the name Bayer on every Aspirin tablet. Aspirin is the trade mark of the Bayer Company, Limited.

**DOES NOT HARM
THE HEART**

THE TENDERFOOT

By **GEORGE B. RODNEY**

Author of "The Coronado Trail,"
"The Canyon Trail," Etc.

SYNOPSIS

"You've fallen heir to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur has been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

Dad Kane, desert rat and luckless prospector till now returns to tell Dustin and Spike Goddard, who had grubstaked him, of his discovery of a rich gold mine, and shows samples of the ore.

Dustin unexpectedly comes along while Stone and Edith are riding fence, and seeing them, stops and talks to Edith. He mentions their dispute could be settled by marrying him, and Edith refuses his proposal with remarks that make Dustin furious. He insults Stone, who promptly throws him into a pool of water.

Stone tells Carr, his foreman, about his meeting with Dustin. Stone and Carr go to Seco to send a telegram to Gerald Keene. While at Seco an attempt is made to kill Stone, who proves more than a match for his enemies.

Dustin learns that Gerald Keene has been sent for, and also that Duro Stone has been the Broken Spur men rustling Carr's cattle. He sets out with Dad Kane to learn the location of his gold discovery. Dad Kane shows Dustin the mine.

They go back to camp, and Dustin shoots Kane. He fixes the shooting on Peyotl Gregg, a drug addict, who, stupefied by the narcotic he had taken, did not know whether he was guilty or not. They bury Kane and then return to the Broken Spur ranch.

Meanwhile at the Hour Glass, Carr, Carr and Stone speculate as to the meaning of entries in the notebook belonging to Dase Kane that Stone had found. Stone thinks of a possible solution, and, accompanied by Edith Carr, rides out to Red Water to test out his theory, which proves correct, and they find the rich gold deposit mentioned in the prospector's notebook. As they return to the ranch, they meet Dustin leaving the house, who, purposely, but unsuccessfully tries to ride down Stone.

(Now Go On With The Story)

CHAPTER XII.—Continued

"It's peyotl," he said sharply. "I know the damned stuff. Peyotl is the old Aztec name. All I know of it is that it is one hell of a kind of dope. After a little while it crazes the user . . . distorts his ideas of right and wrong, you know. If you found those half-smoked stabs by the camp fire, it's pretty clear that whoever was there was using peyotl cigarettes. It's against the law, of course."

"Do you happen to know whether old man Kane uses the stuff?"

"I'm damned sure he does not,"

said Jameson. "He gets bung-fall on red-eye when he comes to town and he gets the Indians to make a fuss for him sometimes, but I'm sure he doesn't dope."

"Think Dustin uses it?"

"Not for a minute. Hardly any one uses it now. The Indians used to use it because they like to get all hopped up and it was too risky selling whisky to Indians. A federal offense, you know. It crazes 'em. I only know one fool about here who ever uses the stuff and that's Gregg out at the Broken Spur. They call him 'Peyotl' Gregg because of the way he gets full on it. He's a half-wit who's been working on the Broken Spur ever since Dustin and Goddard got it."

"Humph! If you're right . . . then this man Gregg must have been at that camp in the hills. If Kane was there then the man Gregg may be able to tell us where we can find him. Tell me this, Jameson . . . What's the main law?" Can a man, who locates an ore-vein, follow that vein when it leads into and under another man's land?"

"I'm pretty sure he can," said Jameson after a moment's thought. "That is . . . he can follow a vein that he finds on a man's land, pick up a vein and follow that. It's got to be done fairly . . . Find a vein on his own land; trace it under some one else and follow it there unless the land owner beats him to it. See? Why?"

"Well, it sizes up this way to me. . . . Dustin and Kane have found ore on the Hour-glass. Carr doesn't know about it. Dustin has bought up a note that Carr gave Peygram, and Dustin will use that note to try to make Edith marry him to save her father. That note gives Dustin half ownership in the Hour-glass and the other half of the Hour-glass, a partner of Sam Dustin. And if Dustin's plans work out, he will marry Edith Carr."

"Just what do you want?" demanded Jameson curiously.

"First of all I want to find old man Kane. He's the key to the puzzle. He's got to tell us just what kind of a deal he's made with Dustin. He can tell us where and how he found that ore. And if it's on the Hour-glass, whether Dustin knew it was on the Hour-glass when it was located. He may be able to tell us if man Dustin uses peyotl. If he does, he's probably not responsible for his actions."

"You're barking at a knot," said Jameson forcibly. "Sam Dustin is always responsible for his actions. Look here, Stone! What stake have

you got in this. You're playin' too close to your lap for me. Come clean, old man."

"You know how the Hour-glass is owned, don't you?" asked Stone suddenly.

Jameson did not know and said so. "Joe Carr owns one half of it. Gerald Keene, the nephew of old Peter Vinton, owns the other half. If one of them dies the survivor gets all."

Jameson stood staring at him for a moment. Then he went to a closet and came back with bottle and glasses. "You're tryin' to talk like a sane man," he said, "but your words just don't target. You don't know this man Dustin. By Carr's note, Sam Dustin practically owns Carr's half of the Hour-glass ranch. Keene owns the other half. A gold-mine has been found on the Hour-glass. Will Sam Dustin give half of the Hour-glass with its gold mine to a man he never saw? What deal will he make with this Gerald Keene? I'll tell you. In some way or other, in some damned dark, deep way that we couldn't think of, Gerald Keene will lose his share of the Hour-glass and Sam Dustin will own it."

"Talk your age," said Stone laughingly. "This man Dustin, that you all credit with superhuman powers, can't work miracles, I reckon. The main thing for me to do is . . . find this man Kane. He's the key to the whole damned mess."

"You're probably right," Jameson nodded curiously. "But, consider this."

In the camp near where that gold-ore was found you found those pieces of peyotl cigarettes. I don't believe anybody about here but that man Gregg ever smokes them. If our guess is right, then Peyotl Gregg was with the man who found or located that ore vein . . . Probably old man Kane. The fact that Sam Dustin had that package in his coat pocket implicates him, of course. You can always get him under the narcotic law. He can explain it, of course. . . . But we don't need that now. Your best bet to find out exactly what has taken place is . . . find Dad Kane . . . And for God's sake tell his man Gerald Keene to watch his step when he gets here."

"What do you mean?" demanded the mystified Stone.

"You half-baked idiot!" Jameson flung himself across the desk.

"This man Gerald Keene represents one-half of the Hour-glass. Sam Dustin virtually owns the other half in the note that he bought from Joe Carr. Gold has been found on the Hour-glass and Dustin knows about it. Do you want to see Sam Dustin marry Edith Carr?"

There was no doubt in Duro Stone's answer to that question.

"All right!" said Jameson after your first plan. "Find Dad Kane! I'll start a still-hunt for him. In the meantime we might try to hand at Peyotl Gregg if we can find him."

With those words in his ears, Duro Stone took his departure.

CHAPTER XIII.

Spike Goddard watched Dustin ride up to the ranch-house of the Broken Spur and turn his horse over to one of the hands. With one glance at his partner Spike emitted a long, low whistle, went to the office, got out decanter and glasses and sat down to wait. Presently Dustin stormed up the steps, banged into the house and into the office, where he stood staring at his partner. Spike's very silence condemned him; also it acted on Dustin like salt on an open cut.

"What the hell ails you?" demanded Dustin curiously. "Anything happen to you?" Spike shook his head. "Nothing ever happens to me," he said. "I stay home and 'tend to my knittin' and nothin' ever happens to me. If I ever went 'trampin'' over the valley trailin' some red-headed girl who likes me just as much as a prairie-dog likes a ground-rattler, I might expect somethin' to happen to me but it never does."

The bottle whiskey passed his head and broke in a score of fragments on the wall. He retrieved his glass that had escaped ruin and laughed.

"You go on an' answer your own question. What all happened to you?" Dustin told him sketchily and Spike listened in evident disbelief. When that disbelief grew too great for words, Dustin turned on him in growing wrath.

"Listen here," he said. "I'm goin' to come clean with you, Spike. Then you'll understand what I'm after."

"I know," said Spike guardedly.

"You're after that red-headed girl of Joe Carr's."

"Yes and by God, I'll get her, too. I went over to the Hour-glass to put it up to her, but she was out ridin' with that damned drug-store cowboy, wanderin' over the country. Six months from now she'll be my wife and she'll have her own kitchen to tend to. She'll be stayin' home then."

"Looks like that ambition ought to keep any red-headed woman content," said Mr. Goddard, grinning. "It looks to me like you've got the means to persuade her. Why didn't you tell old man Carr that you've bought up his note to Peygram for eleven thousand dollars and that if Edith don't marry you, they're both headin' for the Poor Farm? You'd

have him short if you spring that on him."

(To Be Continued)

Finest Cooks In World

Men Have Proved Themselves Greatly Superior To Women

The death of the M. Escoffier, who was chief chef of the Savoy Hotel, London, for a great many years, is a reminder of the fact that although cooking is generally recognized as woman's supreme vocation, the best cooks in the world are men. Most of them are trained in France and Italy. Those who supervise the food in big hotels are men; men who make plain foods marvellous with mysterious additions, sauces and methods of preparation, and invent dishes peculiarly their own and for which they are famous. Escoffier, for instance, claimed that there are 50 ways of cooking ham and eggs. Any one who has ever dined at the Savoy Hotel and sampled what could be done with a potato or an egg, will readily believe Escoffier was not exaggerating.

Continental chefs take their work very seriously. To them the preparation of food is an art just as much as music or painting, and one that requires constant study and experiment. And these artists in food earn bigger salaries than many of the best musicians and painters before the public.—St. Thomas Times-Journal.

THE RHYMING OPTIMIST

By Aline Michaelis

EXULTATION IN STORM

When clouds pile up in the east, Dark bank on bank, And the forces of wind are released, Strong rank on rank, Not a voice in my bosom cries With a lusty shout: I am part of the darkening skies And the Storm-King's rout!

My will is the tempest's will, I laugh, I rejoice At the music, fierce and shrill, Of its angry voice. There is never wind so swift Nor gale so strong But the wings of my being lift To greet its song!

Not New To Prairies

Drought and Grasshoppers Have Visited West Before

The plague of grasshoppers is no new thing to the Western provinces, says Hon. J. G. Taggart, minister of agriculture in Saskatchewan. He has been digging into records of other years, and has found that drought and grasshoppers have visited the prairies before.

Back in 1860 the explorer Palliser crossed the plains. Marking out a triangle with its apex at a point midway between where Edmonton and Saskatoon are now, Palliser had extended the sides of his triangle in a southeasterly and southwesterly direction to the United States border. The explorer doubted if field crops could ever be grown successfully in that area. He had based his calculations on the condition of the soil and the vegetation of the time. Yet many fine crops have been reaped from the land in that area.

But, declares Mr. Taggart there was a dry spell in the 1870's and this was accompanied by grasshoppers in even greater numbers than plagued the West in the last couple of years. And in 1890, there was soil drifting of such a serious nature that some people talked of abandoning the West as a farming country. Yet since 1890 there have been hundreds of millions of bushels of splendid wheat grown on the prairies.—Lethbridge Herald.

Highway Construction

Twelve Mile Stretch Between Keewatin And Manitoba Border To Be Completed

Tender for the construction of the 12-mile stretch of Trans-Canada highway between Keewatin and the Manitoba border, has been let by the Assiniboia Construction Company of Kenora, it was learned at the Ontario department of northern development.

Work will be started soon, and from 100 to 200 men will be employed on the project which will require about six to seven months to complete. Figures of construction costs were not available.

Want Beer Referendum

Taking a referendum at the next provincial general election on the abolition of sale of beer by the glass was urged when a joint delegation from the Alberta Prohibition Association and 14 church denominations interviewed the provincial government. Premier Reid stated in reply that the government would give no request immediate consideration and that the delegation would be advised early of the decision.

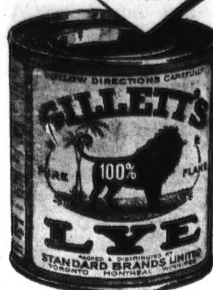

Many a man won't join the church because there are hypocrites in it. He remains outside where there are more hypocrites.

Apes, like men, become gray as they grow old.

GREASY POTS AND PANS NEARLY DROVE ME WILD

UNTIL
I
USED

**It lifts grease
right off
without scrubbing**

Just use a solution of 1 teaspoonful of Gillett's Pure Flake Lye in a quart of cold water. Instantly the grease dissolves—without scrubbing! Use Gillett's Lye whenever you want an effective house-

hold cleanser. Frees clogged drains, cleans toilet bowls. Kills germs, and destroys odors. Order a tin from your grocer!

*Never dissolve lye in hot water. The action of the lye itself heats the water.

FREE BOOKLET—Send for the free Gillett's Lye Booklet. It tells how this powerful cleanser and disinfectant shortens dozens of cleaning tasks. Also gives full directions for soapmaking, thorough cleaning and other uses on the farm. Address: Standard Brands Limited, Fraser Ave. & Liberty St., Toronto, Ontario.

GILLETT'S LYE EATS DIRT

Edison Bought Patent

Englishman Was First To Make Carbon Filament Lamp

The remark by a Toronto professor that Edison was not the inventor of electric light may surprise the majority of people, but it is quite true. The first electric lamp was produced by Sir Joseph Swan, who was born at Sunderland, England, in 1828. He was a chemical engineer who first achieved success in improvements in photography. He made a carbon filament lamp as early as 1862, and in 1860 exhibited the first filament vacuum lamp.

Edison was working along the same lines about that time, and he bought the Swan patent. Subsequently the first lamps issued from his factory were described as "Ediswan" lamps, thus linking the two names together. After Edison had improved on the original Swan lamp.—St. Thomas Times-Journal.

A New Occupation

Proprietor Of Belgrade Store Does Sums For Students

"Sums done for three halfpence a time," is the notice that has been put up in the window of a shop situated opposite a school in Zagreb, near Belgrade, Serbia. The proprietor does a roaring trade. Every evening students deliver their mathematical homework, and every morning on their way to school they call for it—correct in every detail.

Spain is exporting twice as many melons as a year ago.

To Grow Mentally

People Must Advance With Times And Have New Ideas

A row of fence posts placed along the road will remain the same for many years, or until they rot—because they are dead. But a row of trees planted in the same place will grow, and hence change every day, because they are alive.

The test as to whether you are alive or dead depends upon whether you change as you go along. If you are alive you do not believe about anything just what you believed about it ten years ago.

If you do, it's a sign that you're "dead"—and the pity of it is, you don't know it!

And just here is where your life's success or failure is determined. If you are afraid of new ideas, and shrink from thinking about them or expressing them, then you will surely sink into a commonplace job and your life will be just ordinary weak, colorless.

But if you have the courage to live your own life—to think your own thoughts, to look fearlessly into the face of the world, to remember that God created you so that you might increase in knowledge and wisdom, then you will develop into the stature of a full-grown man.—Charles Steidle.

A purple-topped yellow-fleshed turnip which has been grown in Aberdeenshire, Scotland, for the past 100 years has been found by agricultural scientists to be resistant to club-root disease. The origin of this variety of turnip is unknown.

Little Helps For This Week

"The beloved of the Lord shall dwell in safety by Him, and the Lord shall cover him all the day long." Deut. 33:12.

Whatever events betide, Thy will they all perform: In Thy breast my head I hide, Nor fear the coming storm.

I have seemed to see a need of everything God gives me, and want nothing that He denies me. There is no affliction but either in it, or after it, I find that I could not be without it. Whether it be taken from me, or not given me, sooner or later God quiets me in Himself without it. I cast all my concerns on the Lord, and live securely on the care and wisdom of my heavenly Father. If my ways are in a sense hedged up with thorns and grow darker and darker daily, yet I distrust not my God in the least, and live more quietly by faith than I would do if I possessed everything.

The farm implement trade in the Argentine is controlled principally by Canada and the United States, Canadian-made harvester-threshers, grain drills, riding ploughs, corn cultivators and planters being well established.

The Full Vitamin Value of Cod Liver Oil

PLUS Further
Body-Building Virtues

Generations have proved the body-building, energy-giving power of pure cod liver oil. Generations, too, have proved that Scott's Emulsion of Cod Liver Oil gives you all these, PLUS easier assimilation, pleasanter taste, added value of hypophosphites of lime and soda. PLUS values found only in Scott's Emulsion.

**SCOTT'S
EMULSION**

THE COD LIVER OIL WITH THE PLUS VALUE
For Sale by Your Druggist

Line your roasting pan with Canapar Cookery Parchment. The fats and juices won't burn. The meat is more succulent—and you save yourself all the bother of scraping or scouring the pan afterwards.

You can cook three vegetables at once in the same pot—when you place each in a bag of Canapar. No odors escape. All the goodness is sealed in. Use only ONE burner and turn that down low. Save fuel! Boiled or steamed fish is better, and less work, cooked in Canapar.

Just rinse the sheet of Canapar and use it over and over again. It won't absorb odors. Many women use it for a dish cloth. It's just like silk when wet—is very tough and does not shed lint.

Horse Sale

In point of number and excellence of entries the Annual Horse Sale, held here on Tuesday is the outstanding one in the history of these sales. Nearly four hundred horses were entered, and 332 were sold in the ring. As usual, the horsemen who had fitted their animals for the sale drew the long prices. Several teams sold as high as \$250, while individual animals went as high as \$120.00. The average of the 332 horses sold was \$65.53, the total of the sale being \$21,656. The range horses, halter broken brought an average price of \$48.97, and the entries from B.C. and the Walters ranch were snapped up at these prices.

The sale went off without a hitch, and great credit is due the managers for the efficiency of their work. It was a splendid day for the event, and hundreds from all parts of the district and province at large were present; bidding was brisk, and the 332 horses were put through the ring in record time. Messrs. C. F. Dameron and Wm. Durno, of Calgary, were the auctioneers.

A feature of the sale was the entry of large numbers of horses from outside, breeders evidently having come to conclusion that the Lacombe Sale is the outstanding sale of the Province. Two carloads of splendid range animals were brought in from B.C.; thirty animals from Peace River district, and James Walters had a carload of nice young horses and geldings.

SPRUCEVILLE NEWS

Don't forget the Junior's Dance on Friday night, the 22nd, at the hall. Music by Bob Faulstich and his Dance Band.

On Saturday, March 16th, The True Blues held their regular meeting at the home of Molly Heath. There was a very good program. Enough blocks were brought to make a boy's quilt and this will be finished at their next meeting, which will be held at the home of Amy Hutchison.

The U.P.W.A. will hold their regular meeting at Mrs. W. Parker's on Wednesday afternoon, March 27. The roll call will be answered by "Facts About Social Credit." The uncompleted business from last meeting will be presented and discussed, besides which there will be a few musical items.

There will be a Social get-together on Monday evening, March 25th. The Lacombe District Band will furnish music. Also a debate will be given by the Junior Boys; discussions, etc. A good evening is planned. Everybody welcome.

The Hall Board is putting on the dance in the Hall on March 29th. Old Time music of Red Deer.

We congratulate The Spruceville School for winning the Diploma sent by the Dept. of Education, for the best exhibit at the School Fair.

Keep GOING with

BETTER BRAN FLAKES

You can tell Kellogg's PEP Bran Flakes by flavor and crispness. And you can be assured they are genuine bran flakes. Full of flavor and nourishment. Children love them. These truly better bran flakes have enough extra bran to be mildly laxative. Always fresh and ready to eat with milk or cream. Sold by all grocers. Made by Kellogg in London, Ont.

JENKINS' GROCETERIA LTD.

THE SMART SHOPPER KNOWS HER GROCERIES

Now, the average housewife thinks she knows her GROCERIES; but does she? Is it not often true that she buys a can of this or of that at a so-called bargain price—and with this one thought in mind she is apt to overlook the most important thing of all, namely: QUALITY!

Remember, QUALITY is the watchword when buying FOODS! Our stores STOCK ONLY THE VERY FINEST IN FOODS, and our PRICES ARE UNIFORMLY LOW.

RIMBEY NEWS

Miss Lorraine Hogg and Miss Nellie Edie, of Red Deer attended the Curlers Ball on Friday night. They were the guests of Mr. and Mrs. Theo. Wright, in Rimby.

Miss Marguerite Witton and Miss K. McNevin were week end guests of Mr. and Mrs. A. B. McDonald. Mr. G. C. Planche and Mr. E. B. Bourves of the Calgary Power Co. were in Rimby from Monday until Wednesday of last week. On Monday evening they met with the Rimby village council and on Tuesday they were accompanied by members of the council and Board of Trade to Bentley where a joint meeting of representatives from the two towns was held to discuss the advisability of bringing the Calgary Power Company's services into Bentley and Rimby. No definite arrangements were arrived at.

The annual Spring Community Sale held on Wednesday, March 13, under the auspices of the Rimby Agricultural Society was a success, although the attendance was not as large as that of last year. Mr. C. P. Demmon was the auctioneer. Saturday, March 16th was the date set for election of trustees to fill the vacancy created by the resignation of Dr. J. N. C. Byers on the Rimby School Board. Dr. H. E. Halpin was declared elected by acclamation.

The Wooddale W.I. held its regular monthly meeting in the Legion Hall on Saturday, March 16th. There was a large attendance of members and several visitors present. A presentation of a silver screen and silver set was made to Mrs. P. Bowen who has served untiringly as librarian for the W.I. for several years. The hostesses for the evening were Mesdames Eckhart and Veitch.

The Leedale W.I. met in the Leedale Hall on March 2nd. Mrs. Bekke and Mrs. Leo Benson were the hostesses.

Mr. Ole Boode of Red Deer was holder of the lucky ticket No. 46 which won the \$22.50 suit of clothes at the dance held in the Leedale Hall on March 6th.

Mr. R. W. Hale, superintendent of postal service for northern Alberta has leased "Inverloch" the summer cottage on Oak Lake owned by A. B. McDonald of Rimby, for the coming season. Mr. Hale and family were in residence in the same cottage last summer.

Mr. and Mrs. Murray Robertson, of Canby and their two sons arrived in Rimby on Saturday evening to spend a few days with Mrs. Robertson's parents Mr. and Mrs. A. McNevin.

Miss Margaret Berry was the guest of Mrs. H. J. Lamon over the week-end and attended the Curlers Ball on the 15th.

Mr. Stanley Morris of the Bank of Montreal staff has had word of his transfer to the Mannville staff. He will be succeeded by Mr. Munroe, of the Dillburne staff. Mr. Morris will be greatly missed by the various organizations of the community in which he has taken an active part.

I have got up my supply of ice for the season, and will deliver on request. Phone 72. A. Dwan.

What Are Actual Needs?

Listening to a discussion the other day on quotas and schedules adopted by governmental authorities as a guidance to those entrusted with the heavy and extremely difficult task of dealing with the cases of people who at this time are compelled to look to governments for the bare necessities of life, the question was forced upon our attention: What do we actually need?

There are an enormous and varied number of things we want, and our wants differ as greatly as our individualities differ, but when it comes down to a definite listing of the things we actually need—not only to sustain life, but to make life really worth living, the number and variety of such needs is comparatively small.

People to-day list as needs scores of things which less than a generation ago were not even in existence, or so little known and in use as to be regarded as very great luxuries. For example, unemployed people living in our cities and, through no fault of their own compelled to accept municipal and government help, look upon the provision of electric light as an absolute necessity, and would consider it a great hardship if they were asked to resort to candles, or even the old kerosene lamp, as a means of illumination. Yet their parents got along very well with kerosene lamps and their grandparents and great-grandparents did not feel they suffered any great hardship because they had nothing but candlelight. And throughout the length and breadth of rural western Canada to-day hundreds of thousands of people get along very well with kerosene lamps. But in our cities people now list electric light as an absolute need.

Casting our memories back to boyhood days, thirty, forty, fifty years ago, we recall that our clothing and food requirements, our actual needs, were small and inexpensive compared with what we list as needs now. As a matter of fact, many of our so-called present day needs are not needs at all, and if our environment was shifted, we would not regard them as needs. Hundreds of people go camp every year, leave what we term "civilization," and go off into the wilds, and put up with conditions of living, and go without scores of things, and enjoy doing so, which at home they insist upon having as actual needs.

Life, and real living, does not consist in the abundance and variety of the material things we may possess. The pioneer lacked most of the things now listed as absolute necessities, yet they enjoyed good health, were happy, and found life well worth the living. They built homes, reared families of sturdy children, saw beauty in their surroundings, and developed character. Their needs were few and inexpensive. And they built nations.

These years of depression are developing two types of people. Out of one group men and women are emerging with stronger, firmer characters. They are more self-reliant, with hampering superficialities burned away like so much dross, with the result that with the passing of the depression they will be the strong men and women who will take the leadership in this world, and who, out of the experiences of these years, will profit throughout the years to come. The other group consist of those who have been content to drift with the tide, to regard themselves as the sole victims of circumstance, ready to sit with folded hands and let others not merely provide them with actual needs, but who demand that these others shall further burden themselves in order that they may be supplied with things they want over, and above their needs. With the passing of the depression, members of this second group will find themselves unequipped and incapable of making that provision for themselves which they will then be called upon to make.

People in this second group are ruining their own lives and jeopardizing the whole future. Before it is everlastingly too late they should take stock of themselves. The State should and will provide all people with actual needs of subsistence, including shelter, food and clothing when because of the vagaries of nature, or the inability to secure employment, these people cannot supply their own needs. But desires and wants must not be confused with needs. And the fact that the day is coming when all people will have to make provision for their own needs, as well as to gratify their desires and wants, should not be lost sight of.

It would be well, therefore, for all people to give serious consideration to what are needs and govern their demands upon their fellow citizens, as represented by the State, accordingly.

Action Is Rapid

Action of a new hypodermic needle for hospital use is so fast that patients feel nothing when the needle is inserted. The action of the needle reached the brain in one-eighth of a second, whereas pain sensations require one-fiftieth of a second.

Luigi Galvani was a famous Italian physician and anatomist, and the discoverer of current or "galvanic" electricity.

Natives still practice a systematized exchange of wives in Tahiti, largest of the French Society Islands.

CROWN BRAND CORN SYRUP

AN ENERGY FOOD THAT HAS NOURISHED MORE CANADIAN CHILDREN THAN ANY OTHER CORN SYRUP

A product of The Canada Starch Co., Limited

First Used In Italy

Fork Was Encountered By English Tourist In 1603

It is difficult to believe that during the times of Shakespeare and Bacon few Englishmen used the table fork, and that the majority of them knew nothing of it, but a writer of old-time customs tells us that this is a fact.

Thomas Coryate, an English tourist one hundred years ago, visited the town of James I. fixed approximately the date when the fork first came into use. He set out on a tour of Europe in 1603, and on passing into Italy the traveler encountered the fork for the first time, and listed it as a great curiosity.

In his journal of the tour, he said: "The Italians and also most strangers who are residents in Italy do all ways at their meals use a little fork when they cut their meat; for, while with their knife, which they hold in one hand, they cut the meat out of the dish, they fasten their fork, which they hold in the other hand, upon the same dish of meat, so that whatsoever he be that, sitting in the company of any others at meat, should unduly touch the meat with his fingers, from which all the table do out, he will give occasion of offence upon the company as having transgressed the laws of good manners; in so much that for his error he shall at last be browbeaten, if not reprehended in words."

Well-Earned Vacation

Mission Ship Nurse Taking First Holiday In Three Years

The first break in three years of skirting the rugged shores of British Columbia's northern mainland aboard the United Church mission ship *Thorn* came for Mrs. Archie F. Scott, a native of Lawrence Station, Ont., when at the end of January the mission nurse, who has spent but three nights on shore in the last three years disembarked at Prince Rupert, B.C., for a vacation.

Seldom has the little mission ship stayed more than a day or two in any of the 84 ports on its route, which extends from Alert Bay to the Skeena river, far up on the northern coast near Alaska.

Mrs. Scott's husband is engineer of the ship.

Strange Happening

Radio Music Is Heard From The Spout Of A Kettle

Steam comes out of the spout of Miss Ruth Lightbourne's kettle at Oakville, Ont., but the unusual is also capable of producing other things. During a heavy fog, five orchestra music came from the water container as it sat on the stove. The program, which was a half-hour long, faded away, lasted 20 minutes, then faded. During a lighter fog the performance was repeated, but the music was fainter.

There is no radio in the house and the stove is in no way connected with a ground or aerial system. Miss Lightbourne is at a loss to explain the strange occurrences.

Advertise what you will do and then make doubly sure that you do what you advertise to do. That is what makes the fullest success of advertising.

A plant in Norway produces rust-free and acid-resisting steel, having an annual capacity of between 40,000 and 50,000 metric tons.

W. N. U. 2087.

Discovered By Accident

Money Made And Saved In Very Simple Ways

In the modern ice-cream parlor the cream is kept frozen by use of "dry ice," that is, solid carbon dioxide gas. A boy in charge of one of these parlor found that, when he took a piece of this dry ice and put it against the bell of his bicycle, the bell would give a rattling ring. From this it was discovered that frozen carbon dioxide produces notes when ever it touches metal and, as a result, a new method has been found for helping musical instrument makers to attain perfect tuning. A Durban metal worker was asked by a friend, to nickel a capless stick. Though this was against the rules of the firm, he consented. The regular process was to plunge the article a number of times into an electric bath, a slow and costly process, but as an experiment this man tried a special metal finish. The result was so good and rapid that the news of the day was to his employers and the resultant saving in the factory is \$150,000 a year. Tar paving was discovered by a boy who was sent for two gallons of tar to dress a roof and on his way back upset the tar in the road. Later it was found that the stones were firmly bound together, and so came about tar macadam.

Rome's First Newspaper

Was Really Bored Inscrubed With Events Of Day

Cesar founded in Rome what later became a daily paper. Its name was *Acta Diurna*—the Daily Events or Daily Doings. At first it appeared as a white board set up in the Forum, on which the news was inscribed. The Romans crowded around the board to read the news of the day and to learn what their officers were doing. The passage of unpopular laws and corrupt measures would be checked in this way. Beside reporting the doings of the Senate, it had a daily list of births and deaths. It gave receipts of the tax department and news of the courts and reported elections. Naturally there arose a demand for more accessible news, and copyists were employed to make handwritten copies. The news would be dictated to several copyists at a time, and from twelve to fifty, and on some rare occasions as many as one hundred, of these daily news sheets would be made. The Daily Acts was published for more than three hundred years.

Discovers Lost Brother

Ontario Man Locates Relative Whom He Thought Was Killed In The War

Charles Chunn of Windsor, Ont., mailed a postcard on a "bunch" time ago as well as a result two brothers, each of whom thought the other had been killed in the Great War, now know otherwise.

A desire to get in touch with a cousin, A. G. Chunn, gave Charles the clue which led to the discovery of his brother who he believed killed in action at Ypres.

In looking up his cousin's address in a London, Eng., telephone directory, he came across a name listed "E. F. Chunn," the same initials as his brother.

Off went his card of inquiry. Last week he received a reply, verifying the fact his brother was still living and that he had been under the impression Charles had been killed in action.

Made First Pen Nib

Inventor Used Piece Of Steel From Broken Tool

One day a man, breaking one of his tools, saw the piece fall from the floor. A few minutes later, wanting to write a note, he could not find his quill-pen, and thought, as he looked at the pieces of steel on the floor, "Perhaps I might be able to write with one of those pieces." He tried and succeeded. Thus did Joseph Gillett, the inventor of the steel pen-nib, benefit the world.

Gibraltar now depends for its water on rain collected by an artificial catchment area of nearly 40 acres and stored in large tanks, while a supply of brackish water for other purposes is obtained from wells near the sea level.

A new fungus causing brown spotting of peony foliage has been discovered in northern Italy. Warm, humid climatic conditions and temperature fluctuations favor the development and spread of the disease.

Backaches

Indicate kidney trouble. Gin Pills give prompt and permanent relief as they act directly but gently on the kidneys—soothing, healing and strengthening them. 50c a box at all druggists.

Proves That Earth Wobbles

Stars Once Seen Now Do Not Rise Above Horizon

When the astronomers of ancient Greece grouped the stars and found names for them they listed constellations that can now longer be seen from Greece. In this way they supplied Sir James J. Esch, the British astronomer, with a proof of a scientific fact discovered long years after they departed this terrestrial planet. Among the constellations named by the men of Greece 2,500 years ago are some which, although visible then, cannot be seen in Greece to-day because they never rise above the horizon. The wobble, as it is called, is a movement of the spinning earth in which its axis makes a small circle once in every 26,000 years; in other words, each pole describes a circular path in the heavens at the speed of about a foot a year. This slow movement is caused by the pull of the sun and moon on the bulging equatorial part of the globe.

Seek Oil Independence

Germany Hoping Domestic Requirements Will Soon Be Met

Amazing was the resistance offered by the Germans during the war largely because of her scientists, and now the German people are seeking through scientific means to make their country as economically independent as possible. They are increasing their efforts to find substitutes for imports. Not the least of these is petroleum, or the mineral oil from which it is produced. It is now asserted by German scientists that within a few years Germany will be independent of mineral oil imports. Petroleum is being produced synthetically from coal, and success is attending efforts to utilize brown coal—lignite—so extensively found in Germany. In the last year Germany has produced a third of the petroleum needed and she hopes that by 1936 her total domestic requirements will be met.

ALL FOOD MADE HER ILL

Caused By Acidity—Corrected By Kruschen

"It is only fair to pass these facts on," writes a nurse. "I was suffering from over-acidity and stiffness to such an extent that I was completely ill. I couldn't take food. When I actively forced myself to take something I would be wretchedly ill. I have now taken Kruschen for 12 months, and I have no doubt that it has righted my digestive system. I am now quite fit and able to work with vigor again."—Nurse E. S.

Indigestion is caused by a failure in the flow of the gastric or digestive juices. As a result, your food, instead of being assimilated by your system, simply collects and ferments inside you, producing harmful acid poisons.

The immediate effect of the six mineral salts in Kruschen is to promote the healthy flow of the vital juices of the body. As you continue with the "little daily dose," it ensures the regular and complete elimination of all waste matter every day. And that means a complete end to indigestion.

Heated Railway Car

New Type Is Developed For Transportation Of Fruit And Vegetables

Canadian National and Canadian Pacific Railways are developing a new type heated car for transportation of fruit and vegetables, the Canadian horticultural council was told in the report of its transportation committee. The council instructed its transportation committee to draft a resolution which would ask a portion of any federal money voted for building of new rolling stock by the railways to develop a new type heated car. The model he described was charcoal heated, with a system of hot-water pipes similar to a domestic heating plant. The council had asked the railways to consider a gas-burner heater, with inside temperatures regulated by the degree of cold outside the car.

Signs All Can Read

Pictorial signs—a telegraph post for the telegraph office, a trunk for the baggage station, a question-mark for inquiries—are in use at Parkington Quay, Harwich. All the symbols related are known the world over, and foreign visitors of all nationalities can "read" them.

Costly Umbrellas

Two of the largest and most expensive umbrellas ever made have been manufactured in Leicester for Alkenza II, Oba or Chief of Benin. The umbrellas, which cost £15 each, have been made for state purposes. Councils will be held under their shade.

The Finnish statistical office reports that in the 13 main towns and cities of the republic 19,371 married women are engaged in remunerative activity; this is 18.9 per cent. of all married women there.

Holland was one of the first countries in modern times to rise out of the barbarism of the middle ages.

Muskats In England

Introduced For Fur Farming Have Become River Pests

The history of the rabbit in Australia—first introduced to give an English Duke some shooting, later becoming a plague which has cost the land many millions—is being reflected, to a considerable lesser degree, by the muskrat in England. This animal was introduced into Great Britain in 1929 for fur-farming, and later spread so that muskrats have had to be adopted for its control. The story is told in a brochure entitled "The Distribution of the Muskrat in the British Isles," written by Tom Warwick of Oxford University.

There are few places in Great Britain where muskrats are not supporting a muskrat population, for the ramifications of the river and canal systems provide the animal, if left unmolested, with plenty of routes of dispersal. According to Mr. Warwick, while it is possible to keep the animal under control it is almost impossible to eliminate it completely.

In Scotland, which has no slow-moving rivers, the little animal has colonized the rapid trout streams, and here as well as in Sussex, tidal waters have been successfully invaded. It is impossible to keep the muskrat from migrating, but a constant watch is kept on the margins of infested areas. A year or two usually elapse between the escape of muskrats and the establishment of colonies dense enough to attract the attention of the public.

Royalty Goes Shopping

Queen Mary Visits The British Industries Fair And Makes Purchases

A new thief-proof jewel case—its sounds off like an automobile horn when you pick it up—made Queen Mary smile.

Shopping at the British Industries fair in company with the Duke and Duchess of York and one of the Buckingham palace housekeepers, Mrs. Moore, the queen was startled as the ingenious contrivance shrilled out its alarm. Afterward she displayed evident amusement. The royal party walked six miles and the queen, always one of the fair's best customers, bought two dozen hand bags, ordered some Australian produce and quince jam, purchased two treasury note cases, asked that copies of the "National Marks" recipe book be sent her and the duchess and inspected some herring packed in jam.

Meat packers report that more meat was consumed in the United States in 1934 than ever before in history.

The sales of branded beef in Canada for 1934 totalled 39,575,754 pounds, an increase of 5,993,145 pounds over the sales of 1933.

Seven Miles Of Wool

Used In Scarf Weighing Only Two And Half Ounces

A London newspaper says: "With shame and sorrow this column has to admit that it rather shirked dealing with the question of the royal wedding presents at the time of the wedding of Princess Marina and the Duke of Kent. It seemed such a vast task, and photographs of the presents while they were on display gave a much better impression. But now, although so late in the day, it seems a pity not to tell of one present the Duchess of Kent received. It came from the Shetland Islands, and was a self-made gift from the islanders themselves. It was a scarf knitted by Mrs. Thomas Sutherland, who is 80 years old, and contained seven miles of wool weighing only two and a half ounces! That, we maintain, is fine wool. It was plucked by hand from the necks of lambs and spun by the 83-year-old sister of the knitter."

Not Always The Case

Experiments Show Bees Do Not Die After Stinging

Not long ago a nature scientist stated that the victim of a bee sting might always have the satisfaction of knowing that the insect attacking him lost its weapon and its life as a result of the stinging. Now Dr. J. G. Myers, of the Imperial College of Tropical Agriculture, Trinidad, offers proof that this isn't always the case. Dr. Myers conducted a number of experiments with bees under various conditions, inducing them to sting handkerchiefs, insects, and frogs, and he found that even after stinging several times the bee usually recovered. When one of the bees stung him unexpectedly, however, the sting was left in the wound. This he attributes to his own violent reaction to the stinging.—Detroit News.

HEADACHE, BACKACHE?

A Speedy Camera

Photographing simultaneously moving machinery and a clock dial, a camera recently invented in Europe takes up to 2,500 pictures a second and detects errors.

Some of the new automobiles of 1935 look as though they'd make good slides for the children.

Glasgow, Scotland, and the Isle of Man are to be connected by an air service.

Doctors advise this natural corrective for Constipation!

Not a drug . . . safe, effective, economical!

Stop sour stomach, bad breath, headaches and all constipation ills. You can do it easily, cheaply with Quaker Bran.

Quaker Bran, the coating of the wheat, is milled so soft it cannot irritate. Yet it is effective. It works with nature to produce normal, healthy bowel movement . . . persuading the intestinal muscles to normal activity.

Remember, Quaker Bran is different from all prepared bran cereals. It is pure bran, uncooked—untreated—undiluted. For these reasons it is definitely richer in mineral and vitamin content. Serve it with your regular cereal each morning or in muffins, cookies, etc. There is a recipe book in every package.

QUAKER BRAN

Pure, Natural, packaged bran.

A. M. CAMPBELL, Ltd. | Lacombe

Social Credit

This group held its regular meeting at Mr. A. Hill's home Tuesday, March 16th. An able address was given by Mr. Hill on the B.N.A. Act and Social Credit. A reading by Mr. Thompson on Bank Act was also enjoyed.

Delegates from the group were elected to attend Lacombe Constituency Convention which will be held in Lacombe, Wednesday, March 27 at two o'clock.

The weekly broadcast from Calgary was listened to after which the group members had several questions they wanted explained on working of social credit.

The above group held their weekly meeting in the Town Hall on Monday evening, March 18th when there was a fair representation from Group No. 2 and Woman's Group. The business of this joint meeting was to elect a director for the Constituency, which was duly done, Mr. Troit being elected for this office. In the absence of Mr. T. Roberts, Mr. Troit was in the chair.

Mr. Chessor gave an impromptu address on Social Credit which was enjoyed by all.

Notice to all members of the Lacombe-Canyon Social Credit Study Group. That a special meeting will be held in the Lacombe School on Monday night, March 26th to discuss important matters relative to the coming Constituency Convention. Members are all requested to be present. A. J. Bauer, Sec.-Treas.

Good Horses

Rex Ireland, of Chalmers, Peace River, brought to Lacombe last week a carload of the best horses that have been seen in Central Alberta for years. The animals, which were of Belgian breeding, and were raised by Mr. Ireland, consist of mares and geldings from three to seven years of age, and weigh up to 1600 lbs. An Eastern buyer selected eight head on their arrival here, and paid a price over the hundred dollar mark each for them.

Mr. P. H. Thibaudau, of Stettin, has been a visitor in Lacombe during the past week, the guest of Mr. P. G. Owen.

New Linoleum in 12 ft. width and a lot of nice Linoleum and Colocum rugs in all sizes. All 1st quality, no seconds and at the lowest price at Lacombe Furniture Store.

In future orders for all Regal Products will be accepted by T. J. Hampton.

JOHN WILSON'S PUBLIC SALE
Having received instructions from the owner, I will sell by Public Auction at his farm, the S.E. quarter of Sec. 2, Tp. 41, Rge. 27, w4; 1 mile West and 2 miles North of Lacombe.

THURSDAY, March 28th
Commencing at 11 o'clock

- 1 Percheron mare, 7 yrs., wt. 1800;
- 1 mare, 16 yrs.; wt. 1400;
- 1 gelding, 16 years; weight 1400;
- 1 red cow, 6 years old;
- 1 red cow, 5 yrs. old;
- 1 Holstein cow, 3 years old;
- 1 Roan cow, 7 years old;
- 2 heifers, Springing; 3 calves;
- 1 Red Polled Bull, 18 months old;
- PIGS and CHICKENS**
